OBJECTIVE

3rd-year Software Engineering student focused on full-stack development and writing clean, well-structured code. Strong programming foundation makes me learn new technologies and tools quickly. I build efficient, user-friendly applications following solid design principles and i am currently seeking an internship to gain real industry experience.

SKILLS

- **Front End** HTML, CSS, JavaScript, TypeScript, Material UI, React JS, Next JS
- **Back End** Algorithms Development, OOP, DS, SOLID Principles, C#, .Net Core, Rest API
- **Data & Database** T-SQL, SQL Server, Ado.Net, EF, Database Design
- **Other** Win Forms, Git Tools, Docker, Azure

EDUCATION

Nisantasi University, Istanbul Türkiye

Software Engineering (3rd Year)

October 2023 – July 2027

- Completed courses in Data Structures, Algorithms, Databases, Web Development, Software Design, and Object-Oriented Programming.
- Leader of the Nisantasi blockchain club, organized multiple events to expand blockchain literacy and Tech Knowledge in campus.
- Web Developer at ESN Nişantaşı Club, building and maintaining the web application of the club.

PROJECTS

Bank System

- Built a desktop application with C# and a REST API backend and WinForms.
- Used SQL Server and ADO.NET for database operations.
- Implemented features such as account management, transactions, and user authentication.
- Frontend developed with React.js, ensuring a responsive and user-friendly interface.

E Commerce App

- Developed a full-stack e-commerce web application with C# backend and REST API.
- Used SQL Server and ADO.NET for product and order management.
- Built React.js frontend for smooth navigation, product listing, and checkout.

Chat App

- Created a real-time chat application with C# backend, Signal R and REST API.
- Used Entity Framework for database operations with SQL Server.
- Frontend developed with React.js, supporting multiple chat rooms and user messaging.
